Introduction

Summary

The Capital Improvement Program is a six-year plan for funding capital projects by City agencies. The program is updated and adopted each year as part of the Baltimore City Budget.

Baltimore City agencies requested capital funding for more than four hundred projects detailed project profiles organized by agency. Agencies also shared information on 150 priority projects that could be funded if additional capital funds are made available. In total, agencies requested more than \$2.8 billion in funds for construction, repair, modernization, and other improvements. The requests identify more than two hundred different buildings, parks, and other public assets as planned locations for this investment.

(a) Project recommendations with locations in FY25-30 CIP Report

The Planning Commission is recommending \$3.71B in funding over 6 years towards the requested projects.

This report reflects the recommendations of the Baltimore City Planning Commission.

For questions, please contact the Department of Planning at 410-396-PLAN (7526) or visit the Department website at planning.baltimorecity.gov .

Total recommended capital funds by year and source category

	FY25	FY26	FY27	FY28	FY29	FY30	Total (\$M)
General Fund Backed Source	\$164.3	\$234.1	\$231.0	\$179.7	\$175.6	\$201.4	\$1,186.1
Utility Related	\$378.0	\$493.2	\$341.5	\$360.7	\$176.5	\$142.1	\$1,891.9

About the Capital Improvement Program

Capital budget

The City Charter requires the Baltimore City Planning Commission recommend a six-year [Capital Improvement Program](#) (CIP) to the [Board of Estimates](#) each year. The first year of this plan is included as the capital portion of the Baltimore City budget, adopted by the Baltimore City Council in June of each year in a bill known as the [Ordinance of Estimates](#).

The Baltimore City budget includes both the Operating Budget Plan and first year of the Capital Improvement Plan (also known as the Capital Budget). The operating budget funds the daily business of the City, specifically covering programs, services, staff, and supplies. The capital budget funds major renovations, upgrades, or replacements of physical infrastructure and assets. [Prior year budget publications](#) are available through the Bureau of the Budget and Management Research.

The process of preparing the capital budget starts in the fall before the budget is adopted when Department of Planning staff start working with agency staff to update the six-year capital program. In January, each agency presents their proposed capital projects and program to the Planning Commission. The Planning Commission reviews the proposals and makes a recommendation to the Board of Estimates for which projects to include in six-year Capital Improvement Program. The recommended program must fit within the funding levels set forth by the Department of Finance.

Review and adoption timeline

The Planning Commission recommends a new six-year Capital Improvement Program (CIP) each year.

- Starting in late September, the Department of Planning works with participating city agencies to solicit project requests, prioritize projects for funding, and prepare the six-year plan.
- Between December and February, Department staff collect CIP requests and performs a detailed review and prepares a public report.
- In January, city agencies present CIP priorities to Planning Commission followed by the Planning Commission review and approval of the CIP by March.

Participating agencies

Both Baltimore City agencies and quasi-public agencies participate in the capital budget process and prepare a six-year capital program each year.

Participating entities include:

- Baltimore City Information Technology
- Baltimore City Mayor's Office
- Baltimore City Public School System
- Baltimore Convention Center
- Baltimore Development Corporation
- Department of General Services
- Department of Housing and Community Development
- Department of Public Works
- Department of Recreation and Parks
- Department of Transportation
- Enoch Pratt Free Library
- Parking Authority of Baltimore City

Agencies fund, plan and complete capital projects in different ways based on the agency structure and the needs of the agency's specific projects. For example, the Department of General Services (DGS) manages buildings used by other city agencies including the Baltimore City Fire Department, Baltimore City Police Department, and Baltimore City Health Department. The Department of General Services also makes requests and identifies priorities on behalf of the Convention Center and the Enoch Pratt Free Library.

Notably, that the Baltimore City Public School System (BCPSS) Capital Improvement Program is approved separately from that of other agencies. The largest share of funds for the school system's capital budget come from the State, through the State Public School Construction Program (PSCP) supported by the [Interagency Commission on School Construction \(IAC\)](#). The Planning Commission reviews the school system's six-year program and request to the PSCP in the fall of each year. Baltimore City's Capital Improvement Plan only includes City's funds contributed to the school system's regular capital budget so only projects supported by this funding are included in this report.

Capital funding sources

Funding for capital improvements comes from a variety of sources, including general fund-backed sources, state and local funds, utility-related sources, and more.

[General Funds \(Pay-as-you-go\)](#)

Revenue received from various payments to the City, such as property taxes and sale of property. General Funds are mostly used for the operating budget, but Finance allocates a certain amount for PAYGO capital each year.

[Highway User Revenue \(HUR\)](#)

Formerly known as Motor Vehicle Revenue (MVR), funds are State Highway User Revenues allocated by formula. These state funds are restricted to eligible uses, such as transportation projects.

General Obligation Bonds (GO Bonds)

With voter approval, the City borrows money for specific improvements by selling general obligation bonds. GO bonds are debt secured by the full faith and credit of the City, and are presented to voters for approval every two years through questions on the general election ballot. This is a flexible fund source that allows the City to maintain some of its highest priority capital assets and programs, particularly those that are not eligible for any other fund source.

General Obligation Bonds in FY25-30 CIP

For the FY24 and FY25 capital budgets, voters approved \$160 million in General Obligation (GO) bonds across four specific loans: the 4th Affordable Housing loan (\$14 million), the 50th School loan (\$38 million), the 5th Community and Economic Development loan (\$36 million), and 2nd Public Infrastructure loan (\$72 million). The loans are for two years, so each year half of the amount is budgeted.

State Funds Funds from the State are typically in the form of grants, including grants made through Program Open Space.

Federal Funds

Federal loans and grants include Community Development Block Grants (CDBG), Federal Highway Administration (FHWA) grants, and other sources.

Revenue Bonds

Bonds issued by city agencies to be repaid with future dedicated revenue, such as water, wastewater, and stormwater revenue collected from water bills by the Department of Public Works. At times, revenue bonds can be used for non-utility related projects (if an appropriate revenue source is identified and approved by the Department of Finance).

Revenue Bonds in FY25-30 CIP

The Department of Finance authorized the Parking Authority of Baltimore City to budget Parking Revenue bonds as a source for FY25 to FY29 budgets. Parking revenue bonds are loans for improvements that are paid back by future revenues from parking fees and fines.

Utility Funds

Utility funds include current operating revenues from City utilities such as water bills and conduit fees.

Other Other possible sources include County grants, Local Impact Aid, private monies, and Critical Area Management Program (CAMP) and Forest Conservation Offset monies.

Evaluation criteria

Planning staff work with agency staff to determine priority projects for each agency. In making their recommendations, staff consider alignment with agency priorities, evaluation criteria and scores, what additional funding may be needed to bid projects or continue to assemble funds for construction, programmatic items at the level prioritized by the agency, constraints of the fund source, and potential for alternative sources of funding.

In recent years, Department staff worked with focus groups to update the evaluation criteria used in this process. In addition to providing helpful information for the decision-making process, the criteria can act as a guide to what is most important in a capital project, to help agencies develop the most impactful projects. The evaluation criteria are detailed in the table below.

Criteria	Key questions
Mandate	Is this required by Federal, State, or local law?
Equity	Does this address a gap in outcomes based on race, religion, gender, sexual orientation, or income?
Health and Safety	Is there an immediate or long-term health or safety benefit?
Asset Condition	What is the condition of the building or asset?
Return on Investment	Will this increase tax revenue, reduce costs to the City, or leverage other funds?
Environmental Impact	Will the project improve air or water quality or reduce greenhouse gas emissions?
Efficiency and Effectiveness	Is the project an efficient and effective solution to a problem the agency is trying to solve?

About the Capital Improvement Program report

Required information

The [City Charter](#) requires the Department of Planning to publish a report on the long-range Capital Improvement Program adopted by the Board of Estimates. For each capital project included in the capital budget, the report must include:

- a brief description and location,
- the total estimated cost,
- the appropriations authorized to date,
- the appropriations proposed for the next fiscal year,
- the appropriations required thereafter to complete the project,
- and the estimated additional annual maintenance and operation cost.

The goal of this report is to facilitate internal and external review of the city's Capital Improvement Program before and after the Planning Commission review and Board of Estimates adoption of the Ordinance of Estimates. Due to recent changes in Baltimore City's accounting systems, this report does not include appropriations authorized to date, however, Department staff expect to add this information in a future update.

Report organization

The report is organized into sections by agency. Each section starts with an agency overview including:

- A description of the agency and the agency's typical capital projects
- A summary table of projects and detailed project profiles with recommendation within this 6-year program

Following the agency overview, the report provides a detailed profile of projects recommended for funding within this 6-year program. For each detailed project profile, the report includes:

- A project code and name
- A project type: State of Good Repair, Modernization, New Asset, Community/Economic Development, or Replacement (or Unspecified if an agency has not provided a type)
- A location description
- A table showing recommendations by source for the next 6 years (FY25-FY30)
- A table showing estimated project costs

Project recommendations from the Department of Public Works are organized by Bureau and Division (corresponding to project Cost Center) and project requests from the Department of General Services are organized by the agency using the project asset. Other agency projects are organized by Cost Center.

The report also includes an appendix that compares the initial agency requests published in January with the Planning Commission recommendations published in March.

Project locations

Capital funding (including design, planning, and implementation costs) associated with city-wide systems and infrastructure may not be tied to a specific location. Other agency budgets support projects that may be used at one or more location as needed to respond to future urgent needs.

For projects that are specific to a physical location, the profile also includes a locator map showing the project location Community Statistical Area where the project is located. However, it is also important to remember that even these projects often provide critical services for residents outside of the location where they are physically located. The Department of Planning prepares a separate distribution analysis to evaluate the distributional equity of investments included in the proposed Capital Improvement Program.

Explore project locations online

You can explore prior project locations [in this online webmap](#). Department of Planning staff expect to provide an updated online webmap for FY2025-30 requests in early 2024.

Request and estimate tables

Detailed project profiles include tables showing recommendations by year and source and estimated design, construction, and other project costs.

The detail table listing recommendation amounts by source and fiscal year includes an abbreviated name for the source. The table below serves as a reference to explain these abbreviations.

Capital funding source names with abbreviations

	Funding source	Abbreviation
General Fund Backed Source	General Fund	General Fund
	GO Bond - Public Infrastructure	GO Bond - Infra.
	GO Bond - Affordable Housing	GO Bond - AH
	GO Bond - Community/Economic Development	GO Bond - CED
	GO Bond - Schools	GO Bond - Schools
	Highway User Revenue	HUR
	Sale of Real Property Revenue	Real Property Sale
Utility Related	Utility Revenue	Utility Rev.
	County Utility Payments	County Utility Pay.
	Conduit Payments	Conduit Pay.
	Revenue Bonds	Rev. Bonds
State and Federal Funds	State Grants	State Grant
	Federal Grants	Fed. Grant
	Casino Impact Aid	Casino Impact
	Pimlico Impact Aid	Pimlico Impact
Other	Special Grants	Special Grant
	Other Capital Funds	Other Cap.

Reader should note that the total request for FY25-30 may not match the total cost estimate due to several reasons. The project may be supported by another non-city funding source (e.g. a contribution from a philanthropic partner) or an agency may be in the process of funding a project over a longer period than the six-year program. Programmatic items, such as road resurfacing or façade improvement grants, may exclude estimated costs as the amount of work the agency is able to support depends largely on the amount of funding made available.

Capital Project Recommendations by Agency

Baltimore City Information Technology

Agency overview

The Baltimore City Office of Information and Technology (BCIT) is responsible for providing information technology leadership to the entire City, utilizing and leveraging information technology to enhance productivity, broaden the capabilities, and reduce the operating costs of Baltimore City government, thereby improving the quality and timeliness of services delivered to residents. Through the agency's capital program, BCIT aims to stabilize and modernize the infrastructure and applications underlying critical city services to enable them to meet the ever-increasing demands of a digital society.

BCIT's capital projects include updating major applications, public safety technology, and network infrastructure upgrades.

Baltimore City Mayor's Office

Agency overview

The Baltimore City Charter establishes the Mayor as the chief executive officer and empowers the appointment of persons to aid in the discharge of duties. The Mayor's Office oversees the operation of City departments, establishes citywide policies, reviews and develops programs, and executes ordinances and resolutions.

Typical capital projects include those funded through the Cultural Spaces Capital Support program, through which it supports organizations that promote arts and culture in Baltimore City. Capital projects also include Mayoral priorities.

Baltimore City Public Schools

Agency overview

The Baltimore City Public School System mission is to provide excellence in education for every child at every level by focusing on quality instruction, managing systems efficiently, and sustaining a culture of excellence. To support City Schools mission, the Board of School Commissioners is responsible for providing policy direction and wide-ranging oversight that includes closely monitoring student achievement and the budget, as well as appointing key staff. The agency is responsible for maintaining 138 buildings, as well as an additional 10 administrative buildings, 10 modular buildings, and 29 portables (151 rooms).

Typical projects include major renovations and replacements for schools not being upgrades through the 21st Century Schools initiative, as well as systemic building improvements (windows, doors, electrical systems, fire suppression systems, HVAC systems, and more).

Baltimore Convention Center

Agency overview

The Baltimore Convention Center (BCC) serves Baltimore City and the State of Maryland as a catalyst for tourism and economic development. Built in 1979, the Convention Center sells space to host events, trade shows and events by local and community, national, and international associations. The events bring attendees from outside the region to the city, which spurs positive economic impact and tax revenue generation for the City and State. Every year, the Convention Center brings in an average of 500,000 attendees and hosts over 115 events. The Convention Complex was created by City ordinance to operate and maintain the Convention Center. Following the completion of a major expansion in 1996, the Convention Center has 300,000 sq. ft. of exhibit space, making it the 47th largest convention center in the country.

The Department of General Services makes requests for capital projects on behalf of the Convention Center.

Department of Finance

Agency overview

The Department of Finance is responsible for safeguarding the fiscal integrity of the City of Baltimore through the development and implementation of sound financial policies and practices.

Operating through five Bureaus (Revenue Collection, Budget and Management Research, Accounting and Payroll Services, Purchases, Treasury Management), the Office of Risk Management and an Administrative Section, the Department is responsible for the following major functions:

- billing and collecting all funds owed to the City;
- investing and managing the City's surplus cash and funds held in trust;
- allocating available funds and monitoring City expenditures via the budget process;
- disbursing funds for services and goods rendered to the City;
- accounting for and reporting all funds;
- managing the City's debt portfolio, including policy development, issuance, and servicing;
- advising City agencies on risk management issues and in certain cases, obtaining and monitoring insurance policies;
- conducting City-wide safety and accident prevention programs;
- procuring supplies, services and equipment for most City agencies; and
- providing custom printing and graphics activity.

Department of General Services

Agency overview

The Department of General Services (DGS) was approved by the citizens of Baltimore in the November 2008 General Election and began operations as an independent agency on July 1, 2009. DGS is comprised of five divisions: Administration, Fleet Management, Facilities Management, Public and Private Energy Performance, and Capital Projects Division/Design and Construction. DGS is committed to providing healthy work environments and safe, reliable vehicles for City employees by delivering customer service to City agencies, which serve Baltimore's community members and stakeholders.

The Department of General Services acts as the central design and construction agency for improvements to most of the City's buildings.

Department of Housing and Community Development

Agency overview

The Department of Housing and Community Development (DHCD) mission is to ensure that all residents of Baltimore City have access to adequate and affordable housing opportunities in safe, livable, and decent neighborhoods. The Department is committed to expanding housing choices and promoting healthy neighborhoods for all Baltimore residents. Major responsibilities of DHCD include working with communities and other Departments to create equitable and thriving neighborhoods while minimizing displacement through a broad range of investments, code enforcement interventions, property redevelopment, supporting capacity building for community organizations, funding before and after-care programs, summer food programs, emergency assistance, and other human services.

Typical capital projects include demolition/stabilization and associated activities, major redevelopment projects, and homeowner or home repair assistance programs.

PRJ002439: Impact Investment Area Program

The seven Impact Investment Areas in Baltimore were selected as neighborhoods where the City can have the most impact by “building from strength” in an asset-based approach to create stable and thriving neighborhoods. The capital request will support the following activities: site assembly, acquisition and redevelopment, among others and as determined feasible through planning efforts in partnership with community stakeholders.

PRJ003201: On-Call Infrastructure Assessment & Analysis Services

Funding would enable DHCD to utilize DOT on-call contracts or to release a Request for Qualifications for a consultant to work with both agencies and developers on two primary activities. The consultant would review proposed public infrastructure budgets for redevelopment initiatives that are funded with City sources and constructed by the developer under the terms of an approved Public Works Development Agreement. Second, the consultant would prepare assessments to identify the conditions of existing infrastructure and costs to upgrade or replace. This information would be used when evaluating DHCD's requests for redevelopment in Impact of Investment Areas as part of the Standard of Care criteria and to prepare funding requests for pipeline redevelopment initiatives in Impact Investment Areas and major redevelopment sites.

Department of Public Works

Agency overview

The Department of Public Works (DPW) mission is to enhance and sustain healthy quality of life for every resident and customer by providing efficient management of its services. The Department of Public Works consists of three major divisions: the Bureau of Solid Waste, the Bureau of Water and Wastewater, and the Surface Water Service (Stormwater). The Bureau of Solid Waste is responsible for providing waste removal and recycling services, including curb-side collection of mixed refuse, recycling, and seasonal waste for residents in around 210,000 households. The Bureau also provides vacant and abandoned property maintenance services, rat control services, as well as public right-of-way cleaning of streets, alleys, and lots. The Bureau of Water and Wastewater is responsible for the operation of a water distribution system that supplies water to 1.8 million customers in the Baltimore Metropolitan Region. These responsibilities include the operation, maintenance, and security of three watershed systems; three filtration plants; pumping stations; and 3,800 miles of water distribution mains. The Bureau's wastewater activities include collection and treatment of wastewater, the operation and maintenance of two wastewater treatment plants, approximately 3,100 miles of collection and conveyance lines, pumping stations, and the City's system of storm drains. The Surface Water Service consolidates all Stormwater related functions. The Division's mission is to restore the City's surface water to swimmable, fishable conditions in compliance with the Environmental Protection Agency and the Clean Water Act.

Capital projects include improvements to all facilities related to solid waste, water, wastewater, and stormwater service. Project involve repairs for pipes, pumping stations, water filtration, sewage treatment, reservoirs, and more.

PRJ003016: FY25 - Quarantine Road Landfill Compliance Services

The landfill solid waste permit requires monitoring of multiple media including groundwater, air quality, leachate, and stormwater. This capital funding will allow contractors to be hired to perform all necessary environmental control and monitoring projects to maintain compliance with permits and the continued safe operation of the facility. Projects include expansion of landfill gas well field, leachate pump station improvements, groundwater well construction and monitoring, and other as-needed compliance work.

PRJ002543: Environmental Restoration Project 13 (ER4129/ER4084) - Clifton Park

Identify and prioritize cost-effective (capital and maintenance cost) best management practices (BMPs) such as curb bump out, bioretentions, grass swale. The ER4129 Environmental Restoration Project 13 project is a bundle of City of Baltimore (COB) Municipal Separate Sewer System (MS4) and Total Maximum Daily Load (TMDL) restoration projects for various communities within COB's limits under MS4 and TMDL Watershed Implementation Plan (WIP). The ultimate goal for this project is to treat urban runoff and help meet the City's MS4 permit requirements.

Department of Recreation and Parks

Agency overview

Baltimore City Recreation and Parks (BCRP) is the primary provider of recreational, cultural, and physical activities to the residents of the City of Baltimore. Active lifestyles and a connection to nature have been scientifically proven to improve both physical and mental health in all age groups. BCRP provides a wide range of activities in its sports facilities and forty-seven community centers. City residents can participate in indoor and outdoor aquatics, ice and roller skating, hockey, soccer, basketball, football, dancing, acting, music, tennis, track and field, boxing, after-school and out-of-school programs. The Bureau of Parks is responsible for the beautification, management and maintenance of 4,600 acres of parkland. It also plans and implements outdoor recreation programs in City parks, including nature and environmental education at Carrie Murray Nature Center. The Horticulture Division is responsible for the Rawlings Conservatory and Cylburn Arboretum. The Urban Forestry Division is responsible for the planting and caring of all trees in the public rights-of-way and City parks. Park Programs is responsible for the Rhythm and Reels, park permits, park volunteer program, the “\$5 5K” running series, biking, kayaking, hiking, and camping in city parks.

Typical capital projects include improvements to parks, recreation centers, athletic fields and courts, playgrounds, and other facilities.

PRJ002709: Solo Gibbs Park - Phase I Construction

Construct Phase I of park improvements to upgrade areas in the north and southern sections of the park. In the northern section, phase I improvements will focus on expansion of an existing playground, entrance and signage, and a community gathering area with pavilion. In the southern section, phase I improvements will include redesign of the basketball courts, widening the existing Gwynns Falls Trail, and upgrading the gathering area along Leadenhall Street. The addition of a new splash pad was added to Phase 1 in response to community advocacy. The park will be extended southward to West Street to include a former school property and create an expanded lawn for events and sports play.

Project type

Modernization

Department of Transportation

Agency overview

The Department of Transportation's (DOT) mission is to maintain and improve the transportation infrastructure to produce a safe, reliable, accessible, and efficient system for everyone that provides multiple and sustainable modes of transportation for residents, businesses, and visitors — thereby promoting livable and vibrant communities across Baltimore City. DOT is responsible for building and repairing public streets, bridges, and highways, as well as maintaining streetlights, alleys, footways, and the conduit system. Other duties include managing traffic movement; inspecting City construction projects; and developing sustainable transportation solutions.

Typical capital projects include replacement or repair of bridges, sidewalks, alleys, major road reconstructions, construction of bike lanes, intersection improvements, and more.

Enoch Pratt Free Library

Agency overview

The Enoch Pratt Free Library (EPFL) was created by Maryland law in 1882, which enabled the City to accept the donation from Enoch Pratt to establish “The Enoch Pratt Free Library of Baltimore City.” Under the terms of Mr. Pratt’s gift, the Library is owned by the City but administered by a private Board of Trustees. The Library system consists of the Central Library, 21 neighborhood libraries, and two bookmobiles. The Central Library is designated as the State Library Resource Center under State law, with responsibility for providing a wide variety of services including the operation of “Sailor,” the internet-based network of the Maryland library community.

Typical capital projects include renovations or systemic improvements to branches.

Parking Authority of Baltimore City

Agency overview

The Parking Authority of Baltimore City (PABC) is responsible for on-street and off-street parking, including the management of the metered parking system and maintenance of over 800 pay-by-license-plate multispace parking meters, and over 3,400 single-space parking meters; administration of special parking programs such as residential permit parking and car sharing; enforcement of parking regulations; and management and development of off-street parking facilities.

Typical capital projects include improvements to garage structures, elevators, and lighting.

Appendices

Requests and Recommendations Comparison

The following tables show a comparison between the original agency request and the Planning Commission recommendation. The first table shows changes across the full 6-year program. The following tables show changes for each fiscal year. Note that a project may show a change in the fiscal years, but not show in the overall changes if the overall funding for the 6-year program remains the same. Changes in revenue source are not included in these tables.

FY 2025-2030 Overall Changes

	Project	Request	Recommendation	Change (\$K)	Change (%)
Baltimore City Information Technology

Project names and identifiers

Project names

This year's report uses new project naming conventions created by Department of Planning staff to provide a more organized and easy to read project list.

Typical changes to project names include:

- Removing the legacy account ID numbers, CIP number, and outdated fiscal year information
- Using consistent formatting and spacing for contract numbers, building names, and project details
- Unpacking abbreviations, e.g. Water Main instead of WM, and using formal program or projects name as appropriate

To help agency staff or City residents compare projects in this report to prior year reports, the table below provides a crosswalk between the existing and updated project names. Department staff expect to add a second reference table with a crosswalk between legacy CIP project numbers in a future update to this report.

Legacy project and contract numbers

The Board of Public Works and City agencies continue to use legacy project and contract numbers to report on capital projects and related procurement activities. For this report, contract numbers appear in project names for both the Department of Public Works and the Department of Transportation.

Five different types of contract numbers appear in this report as part of project names and descriptions.

Contract type	Abbreviation
Water	WC
Sewer	SC
Stormwater Drainage	SDC

Contract type	Abbreviation
Environmental Restoration	ER
Transportation	TR

Unfortunately, combining contract numbers and project codes used by Workday is complicated by limitations in the city's legacy accounting system and capital project database. A single capital project can include funding for multiple contracts and a single contract can be supported by multiple capital projects. To connect these different project identifiers, the following table lists project codes by related contract number. This table is not a comprehensive reference on this topic and agency staff should use this resource with caution.

Contract number	Project code	Project name
Department of Public Works		
ER4024	PRJ002589	MS4 BMP Monitoring (ER4024)
ER4084	PRJ002543	Environmental Restoration Project 13 (ER4129/ER4084) - Clifton Park

How this report is created

Data sources and tools

Over the past two years, Baltimore City migrated contract and financial management systems to a cloud-based application known as [Workday](#). Data on the Capital Improvement Program is now stored in both Workday and a second integrated application, known as [Workday Adaptive Planning](#) or Adaptive, that combined project information entered by agency staff with financial data maintained in Workday.

This report is based on project details and requests exported from the Workday Adaptive Planning system as Excel files. These Excel files are transformed using a data processing and analysis script (created with [R](#) and [Quarto](#)) to produce this PDF document.

Locations for assets identified in this report are based on several additional sources including:

- Department of General Services building and asset data
- [Department of Transportation bridge inventory](#)
- Data from [OpenStreetMap](#) for non-city owned properties

The locator maps used data from U.S. Census Bureau TIGER/Line shapefiles accessed using the [tigris](#) R package and Community Statistical Area boundaries created by the [Baltimore Neighborhood Indicators Alliance](#).

Excel and CSV files with the project request data included in this report are (or will be) available on the [CIP Reports & Resources](#). Department staff expect to publish a reproducible version of this report including all code and reference data to the [City of Baltimore GitHub account](#).

Credits

This report is created by the Baltimore City Department of Planning by staff including Kristen Ahearn, John Lloyd, Sara Paraniham, Eli Pousson, and Jamie Williams.

Many others, including city staff, planners, engineers, designers, and residents, also contributed to the identification of these projects through their use and attention to the city's public assets.

Updates

- ! Report last updated 03/07/24 12:09:34 PM using recommendations exported from Adaptive Planning on 03/06 09:26:36 AM, requests exported on 03/06 09:26:36 AM, and project details exported on 02/08 03:57:36 PM.

If any corrections or modifications to the report are required, these updates will be noted in this section of the report and a new version posted [to the Department website](#). Additional updates are expected following the Planning Commission hearings with agency staff and Planning Commission adoption of the Capital Improvement Program.

- **2023 January 25:** Minor corrections and updates to project names for BCRP, DHCD, and DPW to better match project names in this report to project names used by agencies in Planning Commission briefing presentations. Add maps for DOT FY25 Requests.
- **2023 March 5:** New version of the report created using recommendation data instead of request data. This version includes an appendix comparing the requests to recommendations overall and by fiscal year.
