12TH DISTRICT
2018 FOOD ENVIRONMENT BRIEF

OVERVIEW

The Department of Planning and the Johns Hopkins Center for a Livable Future collaborate to examine the Baltimore food environment through research, analysis and mapping in order to inform the work of the City’s Baltimore Food Policy Initiative (BFPI). Please refer to Baltimore City’s Food Environment: 2018 Report for more in-depth information.

HEALTHY FOOD PRIORITY AREA

Healthy Food Priority Areas show where four factors related to food access overlap. The four criteria listed below determine if an area is a Healthy Food Priority Area. These areas were previously referred to as “food deserts.”

KEY FINDINGS

• The 12th District has a midrange proportion of residents living in a Priority Area with 28%, compared to 23.5% citywide.
• Nearly 11,000 (31%) Black residents live in Priority Areas, compared to only 1,300 (16%) White residents.
• Seniors are the most likely of any age group to live in Priority Areas.

RESIDENT PERSPECTIVE

“While I am not a big fan of corner stores, the one near my home is exceptional. They provide good customer service, some food choices and grocery items in addition to their regular snacks. Their prices are reasonable and the food presentation and cleanliness is maintained. My experience is not a typical one.”

Maya Brooks
2017 Resident Food Equity Advisor, District 12

PRIORITY AREA FACTORS

1. The average Healthy Food Availability Index (HFAI) score is in the lowest tier
2. The median household income is at or below 185% of the Federal Poverty Level
3. Over 30% of households do not have a vehicle available
4. The distance to a supermarket is more than ¼ mile

HEALTHY FOOD PRIORITY AREA FACTORS BY PERCENT OF 12TH DISTRICT RESIDENTS

PERCENT OF EACH POPULATION GROUP LIVING IN A HEALTHY FOOD PRIORITY AREA

How to read this graph (example):
Of all the children living in the 12th District, 3,055 (36%) live in a Healthy Food Priority Area.
FOOD RETAIL

Healthy Food Availability Index (HFAI) scores show the quantity and variety of staple food groups and healthy options. Scores range from 0-28.5. HFAI awards stores points based on the presence of a market basket of staple foods and whether healthy options of common foods are available (i.e. whole grain bread).

HFAI SCORE RANGE:

- **HIGH**: (19.1 - 28.5)
- **MEDIUM**: (9.6 - 19)
- **LOW**: (0 - 9.5)

STORE CATEGORIES

The retail food environment includes various store types, and stores within each format can serve as sources of healthy affordable food.

SMALL GROCERY AND CORNER STORES

There are 59 stores in this category, an above average number of small stores compared to most other districts. The average HFAI score for these stores is 9.4, which is below the Priority Area threshold.

CONVENIENCE STORES

- **Pharmacy**: Overall, pharmacies have an average score of 9.8. Many have the potential to carry more staple foods, perhaps by connecting specific healthy foods to medical needs.
- **Chain Convenience**: The 9 stores have an average HFAI score of 10, indicating some may carry healthy food, but not significant amounts. This is higher than the small grocery and convenience stores on average in this district.
- **Discount**: There is 1 discount store in District 12 which sells a variety of non-perishable and some perishable foods. The store accepts SNAP but not WIC, which may mean it is not accessible to all shoppers, especially those with children.

SUPERMARKETS

Overall, supermarkets provide the widest variety of healthy staple foods. The 3 supermarkets are run by 2 different operators, and while similar in basic stocking, may vary significantly in features not scored or measured by this analysis, such as quality or affordability.
**FOOD AND NUTRITION ASSISTANCE**

**SUMMER MEALS**
36% of children in the district live in Priority Areas. The 12th District served 151,061 summer meals across 78 sites in 2016.

**AFTER SCHOOL MEALS**
29 after school meals sites serve the 12th District, out of 268 sites citywide.

**FOOD PANTRIES AND MEALS SITES**
There are 53 sites that are served by the Maryland Food Bank, out of 425 sites citywide.

**SENIOR MEALS**
There are 5 Eating Together sites serving 138 seniors. 40% of seniors in the district live in Priority Areas.

**URBAN AGRICULTURE**

**FARMERS MARKETS**
2 farmers markets serve the district. Both market accepts SNAP and some vendors at both accept WIC benefits.

**URBAN FARMS**
There are 4 urban farms, the most of any district.

**COMMUNITY GARDENS**
The 15 community gardens spread throughout the district may provide opportunities for household-level food access.

**HEALTHY FOOD ENVIRONMENT STRATEGY**

Food environment mapping and analysis inform and guide BFPI’s work. The 2018 food environment analysis led BFPI to update its guiding Healthy Food Environment Strategy. The following citywide goals have applications at the state, city, and neighborhood levels. These maps and analyses are used to inform, create, and evaluate food policies. Together, BFPI agencies implement the following strategies:

- Support resident-driven processes to guide equitable food policy, programs and resources
- Improve small grocery, corner, convenience stores
- Retain and attract supermarkets
- Increase the ability of the public markets to anchor the healthy food environment
- Implement supply chain solutions that support healthy food distribution and small businesses
- Maximize the impact of federal nutrition assistance and meal programs
- Support urban agriculture, emphasizing historically disenfranchised populations and geographies
- Address transportation gaps that impact food access

**FOOD ENVIRONMENT REPORT**

**FOOTNOTES:**

1. Chart displays 185% of Federal Poverty Level by count of residents adjusted for household size. Priority Area poverty calculations are based on household Median Income.
2. *Per US Census categories, “Other” is a combination of American Indian, other, Hawaiian/Pacific Islander, and “Two or More”. **Hispanic is an ethnic classification that includes all races. There may be overlap between Hispanic and other racial categories.
3. Percent increases are based on citywide averages as data by district is limited.
